Freeradius 2fa with ldap and google

root@zabbix:/usr/local/etc/raddb/sites-enabled# more my_server

```
server my_server {
listen {
        type = auth
        ipaddr = *
        port = 1812
}
authorize {
        filter_uuid
        filter_google_otp
        ldap
        if (ok || updated)  {
        update control {
        Auth-Type := LDAP
        }
        }
}
authenticate {
        Auth-Type LDAP {
                ldap
        }
}
}
```

ldap conf

```
ldap {

    identity = 'CN=freeradius_svc,OU=Service_accounts,DC=migrosonline,DC=com'
    password = 'Cumartesi2023.'

    base_dn = 'OU=ADoutVPNusers,DC=migrosonline,DC=com'
```

```
    user {
          base_dn = 'OU=ADoutVPNusers,DC=migrosonline,DC=com'
          filter = "(sAMAccountName=%{%{Stripped-User-Name}:-%{User-Name}})"
          control:My_Group = 'memberOf'
          }

  }
```
