problem ip

api requests says none amk

- api fallback

api fallback

```python
def ip_bilgisi(ip):
    apis = [
        f"https://ipinfo.io/{ip}/json",
        f"https://ipapi.co/{ip}/json/",
        f"http://ip-api.com/json/{ip}"
    ]

    veri = {}

    for url in apis:
        try:
            r = requests.get(url, timeout=5).json()

            if "city" in r or "region" in r or "country" in r:
                veri = r
                break
        except:
            continue

    return f"""
IP: {ip}
Ülke: {veri.get("country") or veri.get("country_name")}
Şehir: {veri.get("city")}
Bölge: {veri.get("region")}
ISP: {veri.get("org") or veri.get("isp")}
Saat Dilimi: {veri.get("timezone")}
"""
```

this code will try 3 https url to request if you have an problem with json you can try this.
