

ECLIT - IMAP

What happend while i build IMAP for eclit comany ? Yyou might find python tricks in there.

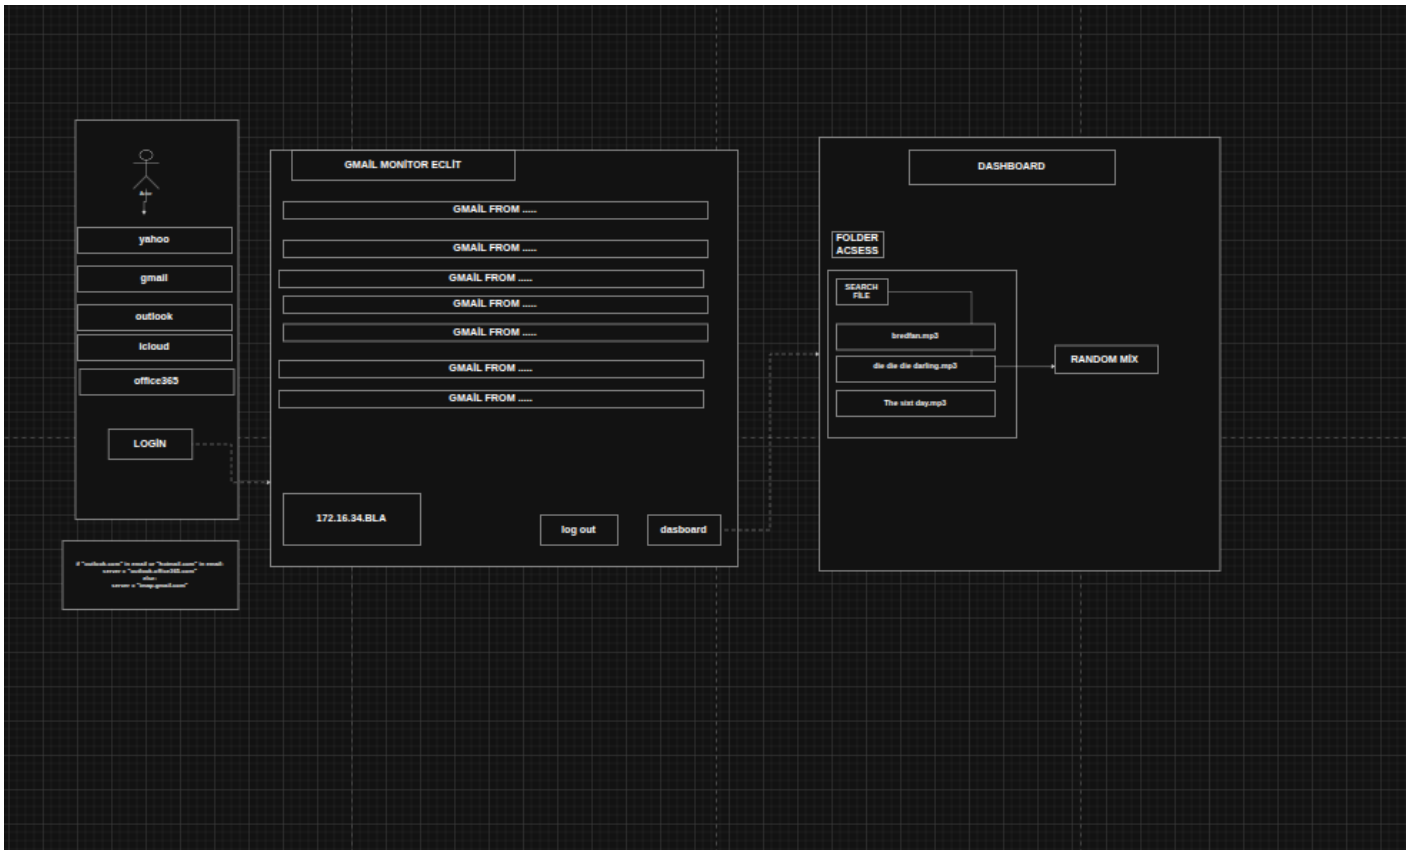

- [PROVIDER](#)
 - [THE PLAN](#)

PROV?DER

The provider for enable email types

PROVIDER

THE PLAN

this is the plan after i decided to add provider. The reason i add provider The company was using by yahoo and i want that code to able almost all popular services, this is cause i add provider.

The provider is most useful way to do this , sctually almost one way to this
