

Log Tailing (File Tailing) with AI integration

The Real time log watcher with ai intergration

- [project plan](#)
 - [THE SYSTEM PLAN](#)
- [tests](#)
 - [FIRST TEST \(EVENT , LOG WATCHER\)](#)
- [problems](#)
 - [CODE 429](#)
 - [INVALID MODEL](#)

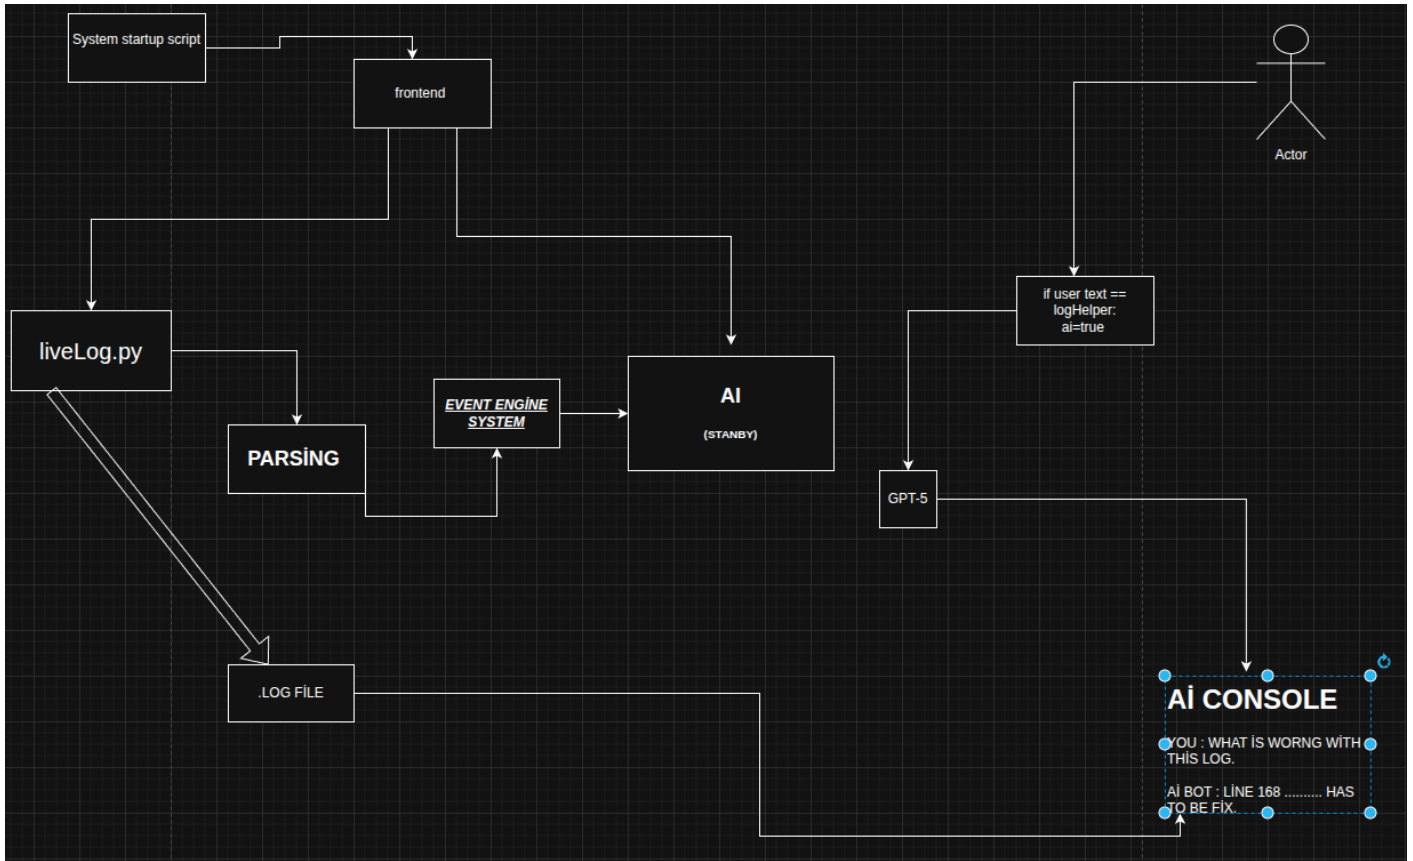

project plan

The plan i make, before i wrote the project

project plan

THE SYSTEM PLAN

The point is give user more info about the logs like (" AI :this code broke from 145 lines and fix protocol is")

tests

Testing my project

tests

FIRST TEST (EVENT , LOG WATCHER)

```
mercan@mercan-A11-Series:~/logs$ python3 main.py
Log dosyası: app.log
Log izleniyor...

ERROR: patladı>>> AI çalışmalı burada <<<
[0] 0:python3* "mercan-A11-Series" 01:58 04-An
```

-- For now its working well now we have to add ai integration to this..

REAL TEST RESOULDS:

<https://www.youtube.com/watch?v=1nRRedCF4qo&t=107s>

problems

The problems while i created project

problems

?NVAL?D MODEL

Somehow i cant use the gpt -5

solution: Change model as another gpt model for now.
